Dear Authors, Allowing also for the interesting comments received, it would have been better to see a more lively discussion around your work and not to receive your responses and rebuttal only at the end of the discussion phase (with authors’ comments only allowed to come in). Anyhow, I would remind you that you cannot still upload a revised version. Instead, based on your replies, now the system waits for an editor’s decision about whether or not the authors are allowed to submit a revised version. My decision will be released shortly. Warm regards, NRomano.
