Interactive comment on “Investigating the impact of land-use land-cover change on Indian summer monsoon daily rainfall and temperature during 1951–2005 using a regional climate model” by S. Halder et al.

Received and published: 14 July 2015

We are thankful to Dr. Roger A. Pielke Sr. for the encouraging words about the paper. We will add the recommended papers in the revised version of the manuscript. However, please note that the following two papers have already been referred in the present version.

We will make corrections to the lead author’s name for the second paper, in the revised version.
