General comments

Both reviewers identify the significant and valuable contribution of the work, particularly in regards to current efforts by the World Bank. These strengths provide a strong rationale to respond to and address the reviewers’ other suggestions for improvement.

The attached Supplemental Material provides individual responses to each reviewer’s comments and points out manuscript revisions that address these comments. Numbered red text quotes original reviewer comments. My responses are indented in black. Further indented black text indicates quotations from the revised manuscript.
which appears below starting on page 8 of the Supplemental Material. The revised figures appear below. Thank you for the opportunity to revise and improve the work.
