Received and published: 23 October 2018

Dear Colleague,

Many thanks for the comments and suggestions.

These would be help in an improvement of the manuscript.

I note that you read the original version of the manuscript. We have made a major revision recently, referring to the comments by RC #1 and RC #2. A significant improvement would be obvious, and I would attach the new version in this response.

However, I realize that most of your comments and suggestions are extra, and we intend to make a further revision accordingly. We will submit the revised manuscript in one month.
