Dear authors,

The review comments that were provided were detailed and to the point. Your replies to them were thorough and showed that you have a clear view of the way you want to address these comments. Overall, the reviewers view the paper positively, and I share that view.

I therefore kindly request you to revise the paper along the lines you have indicated in your replies. I believe this will mainly comprise adding background/methodological
information and clarifying sections of the text, but no major additional analysis, calculations, etc. I therefore believe a minor revision will suffice. I may ask a brief review of the revision, but perhaps I can rely on my own judgement.

Yours sincerely,

Gerrit de Rooij

Editor
